### ***Drawings***

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on August 13, 2001, has been disapproved. The proposed drawing correction to Fig. 9A appears to contain new matter with a particular showing of a head immobilizing board.

### ***Specification***

The specification is objected to as failing to provide an adequate Brief Description of the Drawings, 37 CFR 1.74. A mere listing of the Drawing figures followed by "show embodiments of the present invention" is not an adequate brief description under 37 CFR 1.174. The relationship between the various figures should be set forth including reference to all section lines as well as a brief statement of what the figures particularly show.

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention: There are two Groups of species from which applicant must elect.

I) (as to support device): Fig. 8A/9A; Fig. 10; Fig. 11A/11B

II) (as to edging of the support device): Fig. 5A; Fig. 5B; Fig. 6A; Fig. 6B

Art Unit: 3673

Applicant is required under 35 U.S.C. 121 to *elect a single disclosed species from each of the above listed Groups of species* for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3673

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Safavi whose telephone number is (703) 308-2481. The examiner can normally be reached on Mon.-Thur., 8:30-5:00.
